

THOBELA METU

WEB DEVELOPER

I am a skilled web developer with two years of experience building websites using technologies such as JavaScript, WordPress, and PHP. I have a strong passion for the creative process of designing modern and visually appealing websites and applications. I am a detail-oriented team player, constantly seeking opportunities to challenge myself and grow my ability to produce high-quality solutions.

EXPERIENCE

WEB DEVELOPER

Weaverbird Web

2022 - Present

- Led the development of multiple websites using WordPress, Elementor, WPBakery, and WooCommerce, ensuring high-quality design and functionality.
- Developed custom plugins and themes for clients, extending existing features or creating new functionalities from scratch using PHP, JavaScript, and MySQL.
- Implemented SEO strategies to optimize client websites, enhancing search engine visibility and improving site rankings, leading to increased organic traffic and user engagement.
- Managed weekly client site updates and maintenance, ensuring that all websites were up-to-date, secure, and running efficiently.
- Diagnosed and resolved malware issues, applying security hardening measures to safeguard client sites against potential vulnerabilities and threats.
- Maintained consistent communication with clients, discussing project progress, gathering feedback, and providing technical support to enhance client satisfaction.
- Responsible for setting up the domain, hosting and wordpress installations and business emails for our clients

SYSTEM ENGINEER

Docomo Digital/Bango

2019 - 2022

- Managed Icinga2 service check configurations for the companies IT infrastructure using Python, Git, Bash, MySQL, Linux, Docker, and more.
- Automated Icinga2 tasks using Python, Bash, Icinga2 API, and Ansible.
- Used Jenkins for continuous integration to deploy Icinga2 service configurations.
